

a band carried by the exterior drum surface including at least one band tip overlapping the exterior drum surface; and

at least one end cap affixed to a band tip overlapping the exterior drum surface for operably enclosing a drum end when in drum form;

at least one raised billet carried by the interior drum surface for operably securing an end cap enclosing a drum end when the fly pack is in drum form; and

a pull knob carried by at least one end cap to assist in operably opening or enclosing a drum end with the end cap when the fly pack is in drum form,

whereby the fly pack can be opened and accessed at either end or unfastened and opened entirely for access to the flies secured upon the fly nap.

Remarks:

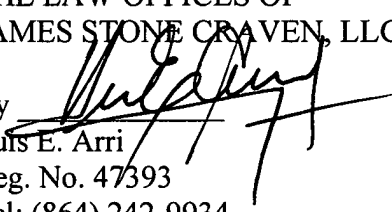

This Amendment does not introduce any new matter. Claims 18-24 are canceled. The amendment to Claims 1 and 25 only corrects informalities pointed out by the Examiner in the Office Action. The Inventors would like to thank the Examiner for pointing out the oversight and respectfully request the Examiner to accept and introduce said claims as herein amended.

Upon the introduction of this Amendment, all the claims remaining in the Application have been allowed, as indicated by the Examiner on the November 2, 2005, Office Action. Furthermore, after the correction by this Amendment of the informalities indicated by the Examiner, the Inventors respectfully submit that this Application is

ready for allowance and request the Examiner to issue the corresponding Notice of Allowance.

The Examiner is respectfully invited to call the undersigned attorney to the telephone number shown below should the Examiner need to address any other pending issues.

Respectfully yours,
